

AI Semantic Segmentation

No More Getting Lost Mid-Speech

In fast-paced speeches or live presentations at work, the self-developed AI Semantic Segmentation identifies natural pause points in lengthy speeches. It starts translating, just one sentence behind you, catching pauses like a human interpreter.

150+ Global Servers

Global Mobility, Local-Network Latency

Designed for business travelers, it ensures uninterrupted communication across trade shows, remote offices, or any global destination. Deliver rock-solid translation stability and near-zero latency

AI Voice Cloning

Let Peopler Hear You, Not the Translator

When robotic tones flatten "I miss You", AI Voice Cloning carries your laughter and sighs across 42 languages, ensuring your loved ones communicate with you, not the robot.

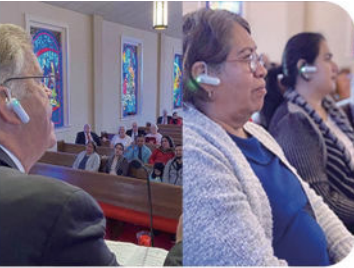

Solutions in Action

First Pentecostal Holiness Church

with Hispanic audience
"We united people together. And bring love and faith beyond language barriers."

--- Priest in Tarbovo, USA

General Motors (GM)

in overseas business trips
"I am a Mechatronics Validation Engineer on Self Driving Electric Vehicles. Thanksto Timekettle in playing a pivotal role in my Germany trip!"

--- Arif Waheed, USA

Ottumwa Community Schoola

with Korean students
For non-English speaking students "Every-body saw the potential. We just saw that this was a huge potential for our kids in order to get academic language to our students while they're learning English."

---Mike Stiemsma, Director of Special Programs. USA

Multicultural Family

with family and friends
"Timekettle saves my marriage! I can hardly wait to talk to all my family in Finland. Plus my family in the Netherlands. No more drawing pictures!"

---Stefan K., Canada

HEBEI IMPACT Medical Technology Co., Ltd.

with Chinese customers
"My customers speak in different accents. But thanks to the translator earbuds, I can easily communicate with people from all over China."

---Kikuchi Yuto, Japanese certified prosthetist orthotist

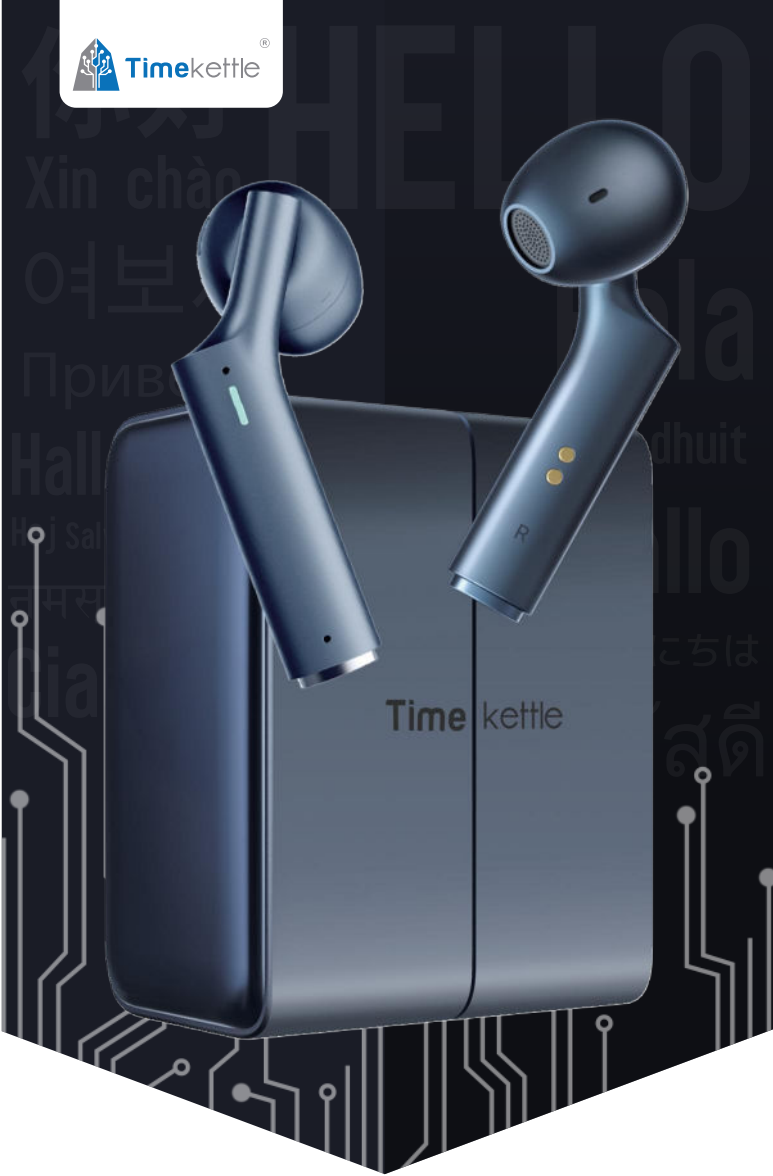

About Timekettle

Since 2016, Timekettle has been a leading translation solutions provider, developing translation devices that merge AI and hardware. With headquarters in Los Angeles and Shenzhen, it's known for rapid interpretation, superior accuracy, and ease of use. The company has won international awards, including CES Innovation, iF Design, and Japan Gooo Design, and is the top-selling translator brand on Amazon. Timekettle's devices interpret 100M+ characters monthly, serving users in 171 countries and regions and earning global trust, making it the leading US interpretation brand.

Timekettle W4 AI Interpreter Earbuds

World's First Bone-Conduction
AI Interpreter Earbuds

World’s First Bone-Conduction AI Interpreter Earbuds

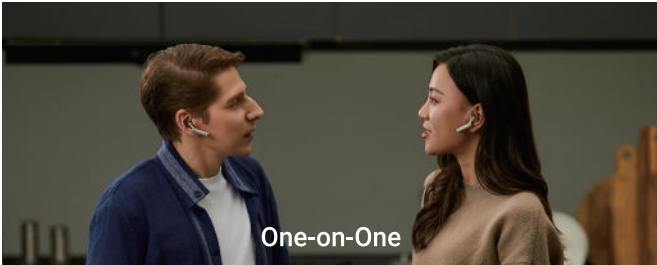

Translate Accurately in the Crowd

At roaring trade shows or crowded streets, with a bone-voiceprint sensor and directional microphones, isolate your voice through 100dB of noise and capture it with up to 98% accuracy, so no shout goes unheard.

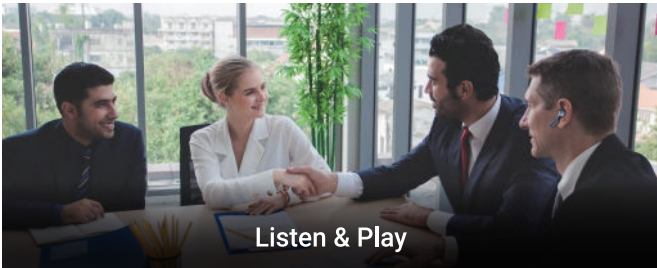

Real-Time Translation, Natural Dialogue

Forget clunky devices or awkward pauses. When negotiating contracts or bonding over coffee, simply speak naturally—W4 translates conversations in 0.2 seconds, with the precision that captures idioms and industry jargon. No buttons, no delays—just fluid dialogue that feels like talking to a colleague, not a machine.

Onsite Meeting Translate, Own Your Focus

Effortlessly engage in international conferences with the W4 earbuds, capture every thought with real-time translation, and share your ideas confidently—your voice, instantly translated and heard loud and clear. Experience smooth, effortless communication as you seamlessly express your thoughts and engage with others in real time, making every meeting productive and stress-free.

Business Meetings

Streamline Workflows, Elevate Efficiency, and Secure Deals.

W4 maintains eye contact while correcting critical terms, such as “buy/bye,” in real-time—translating contracts, recording terms, and auto-generating memos. Seal deals with zero lost in translation.

Family & Relatives

Allow Cultural Differences, and Let Love Speak Freely.

Share an earbud to capture Grandma’s jokes and sighs effortlessly. Our natural expression AI adapts idioms and tones, turning fragmented chats into shared laughter.

In-Person Medical

Precise Medical Terms, Eliminates Mix-Ups.

W4 isolates medical terms through clinic chaos, ensuring "appendicitis" isn't heard as "indigestion". Real-time dual monitoring keeps diagnoses accurate.

Pay Once, Lifetime Upgrades

No recurring fees, single payment gets you unlimited free updates for life, access to all future features & tech updates.

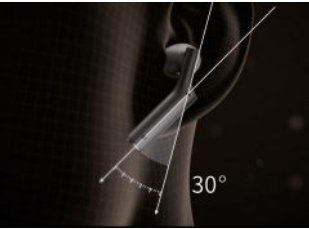

Lightweight Design

Pocket-sized and sleek with a fingerprint-resistant matte coating.

Ergonomic Bone Fit

An extra 30° tilt in the stem brings a snugger fit-no adjustments needed, just better capture.

Full-Day Power

4H of active use and 20H from the charging case support all-day translation.

Supports 42 Languages and 95 Accents

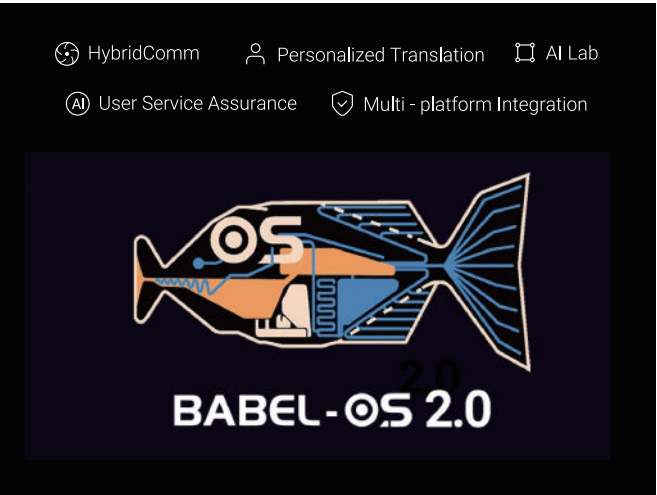

Covering over 95% of global regions, so you can start a real conversation with anyone, anywhere.

English	Korean	Croatian	Slovak	Icelandic
French	Catalan	Hungarian	Slovenian	Ukrainian
Spanish	Czech	Indonesian	Swedish	Urdu
Portuguese	Danish	Malay	Tamil	Filipino
Arabic	Finnish	Dutch	Telugu	Russian
Chinese	Greek	Norwegian	Thai	Cantonese
German	Hebrew	Polish	Turkish	Burmese
Italian	Hindi	Romanian	Vietnamese	Persian
Japanese		Bulgarian		

Intelligent, Personalized, Evolving AI Translation

Faster, Clearer, Smarter

Timekettle’s BoostClean noise isolation and TurboFast 4-channel processing filter out distractions in real-time, enabling instant response and ensuring every word lands with crystal clarity.

Applicability of LLM Model

Auto-Correct, Say What You Really Mean

Start "ship it" and stop "skip it", save million-dollar missteps. LLM-powered correction catches 85% of homophone disasters – turning contract landmines into closed deals.
